Monthly contracts made, and sample casks of 1 cwt. sent 1 to 2 cwt. forwarded (insured) from their works.

HUBBARD'S PATENT WHITE ZINC PAINT. TO PERMANENTLY WHITE.
By its excellent history mentioned in the use of the artist, it is not inferior at the price of the ordinary white lead.
Four years since the proprietors placed their manufacture in a large scale, and put this elegant paint in competition with the best.

It is contained superior to every other paint hitherto known, and is a most valuable and useful paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health, and is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.

In justice to the proprietors these should not be misjudged with the original, even though sold under the pretence that it is the same.
It is a most valuable paint, and is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.

It is a most valuable paint, and is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.
The powdered White Zinc also may be had for grinding in oil, and is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.

A singular with full particulars may be had of THOMAS HUBBARD and SON, Colour Manufacturers, opposite the London Dock.

PURE PATENT WHITE ZINC PAINT. From the VIREILLE MONTAGNE ZINC MINING COMPANY OF BELGIUM.—This PAINT is superior in every respect to the best of the kind, and is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.

It is a most valuable paint, and is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.

THE WASHINGTON CHEMICAL COMPANY.
NEWCASTLE-ON-TYNE.

PATTINSON'S OXIDICHLORIDE OF LEAD.
The Washington Chemical Company having, during the last year, established a Manufactory of Pattinson's Oxidichloride of Lead on a large scale, and being able to supply it with regularity and to execute orders without delay, now proceed to bring the same to the notice of the public. Long before their friends are aware of its public, quite sure that it will not in the present age, be considered as a new and valuable discovery, it is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.

Pattinson's Oxidichloride of Lead is a chemical combination of Lead, it being well known that common White Lead is a chemical combination of one equivalent of Oxide of Lead, and one equivalent (or three-fourths) of Carbonic Acid, constituting what is called the white lead. It is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.

It is a most valuable paint, and is a most valuable paint for the interior of houses, frequently made from fine iron, containing lead, arsenic, and other deleterious materials, and is very healthy, and does not injure the health.
